Yes. You may send the files to NMED. They already have the option for access through the Inspector WIKI. There is also the Small Business Compliance Guide which has some timelines and summaries which might be useful.  
<https://www.epa.gov/sites/production/files/2016-08/documents/2016-compliance-guide-oil-natural-gas-emissions.pdf>

The CA Portal will be launched by then, so we can give them the link to that.

It might be helpful to give an overview of the Inspector WIKI to NMED - it doesn't have O&G specific stuff beyond the flowcharts, but it has a lot of other inspector resources. I can hook you up with our CPS folks who handle all things Inspector WIKI.

I have some slides for that already, if you want those.

Agreed, we need to develop some O&G Training...it has been in such flux its just hard to nail it down.

Thanks Marcia for this information. Can I send this material to NEMD?

There is no need to get more info from OAQPS at this point. Training is this week, and NM responded that focusing on storage vessel affected facility requirements is fine. This is where we have had the most experience.

However, we should consider developing a more inclusive NSPS training as we have received requests in the past. Let's think about that, when time is more available.

Chris

FYI. I also owe you the flow charts. Have not forgotten. LMK if you want to meet with OAQPS to see if they can create something from the vid clips.

Marcia-

Besides the draft video clips/ scripts and small entity compliance guide we don't have any compliance materials. I was thinking even the presentations/pagers we've done I

don't think would be useful for this purpose. We could look to take at the video / script drafts and help put them in a more usable format to assist with OECA's inspector training. We have a new-er person in our group helping with comms materials, I can poke around to see if (1) our GL is ok with her helping out and (2) she has time. Or if you have a contractor helping, we could look into just sharing whatever drafts we do have. Do you have an idea of structure/ outline? Happy to brainstorm further.

I'm not aware of anything. We did record a series of videos after the rule went out to explain the individual requirements. I don't think those were ever finalized or released. Amy may have an idea of other materials.

Do you have any webinar materials you have used for either rule? We are conducting some inspector training in NM in April. Thanks.
